Constants

For each constant c ,

1. $\emptyset \vdash c:ty(c)$
2. If $ty(c) = x:\tau_x \rightarrow \tau$, then for each v such that $\emptyset \vdash v:\tau_x$ $\llbracket c \rrbracket(v)$ is defined and $\vdash \llbracket c \rrbracket(v):\tau$ $[v/x]$
3. If $ty(c) = \{v:b \mid e\}$, then $e[c/v] \hookrightarrow^* \text{true}$ and $\forall c' \ c' \neq c. \neg(e[c'/v] \hookrightarrow^* \text{true})$

Semantic Typing

$$\begin{array}{l}
\Gamma \vdash e \in \tau \doteq \forall \theta. \Gamma \vdash \theta \Rightarrow \theta \ e \in \llbracket \theta \ \tau \rrbracket \\
\Gamma \vdash \tau_1 \subseteq \tau_2 \doteq \forall \theta. \Gamma \vdash \theta \Rightarrow \llbracket \theta \ \tau_1 \rrbracket \subseteq \llbracket \theta \ \tau_2 \rrbracket
\end{array}$$

Lemma 1 .

1. If $\Gamma \vdash \tau_1 \preceq \tau_2$ then $\Gamma \vdash \tau_1 \subseteq \tau_2$
2. If $\Gamma \vdash e:\tau$ then $\Gamma \vdash e \in \tau$

Lemma 2 If $e \hookrightarrow e'$ then $\Gamma \vdash \tau[e'/x] \preceq \tau[e/x]$

Lemma 3 (Substitution) If $\Gamma \vdash e_x:\tau_x$, then

1. If $\Gamma, x:\tau_x, \Gamma' \vdash \tau_1 \preceq \tau_2$ then $\Gamma, [e_x/x] \Gamma' \vdash [e_x/x] \tau_1 \preceq [e_x/x] \tau_2$
2. If $\Gamma, x:\tau_x, \Gamma' \vdash e:\tau$ then $\Gamma, [e_x/x] \Gamma' \vdash [e_x/x] e:[e_x/x] \tau$
3. If $\Gamma, x:\tau_x, \Gamma' \vdash \tau$ then $\Gamma, [e_x/x] \Gamma' \vdash [e_x/x] \tau$

Lemma 4 (Preservation) If $\Gamma \vdash e:\tau$ and $e \hookrightarrow e'$ then $\Gamma \vdash e':\tau$.

Lemma 5 (Progress) If $\emptyset \vdash e:\tau$ and $e \neq v$ then there exists an e' such that $e \hookrightarrow e'$.

Interpretations
